Lancaster Farming

VOL. 7 NO 13 | Lancaster Farming, Saturday, February 24, 1962 | $2 Per Year

A NEW STRAIN OF HOUSER-TYPE CELERY will be available to growers in 1963 Here, looking over some of the samples of the newly-released Pen-H-46 strain taken from a trench on the farm of Amos Funk, Millersville, are left to right, Funk, James Dutt, Extension Vegetable Specialist from the Pennsylvania State University, Cy F Campbell, In charge of Seed Certification Service in the Bureau of Plant Industry of the Penna Department of Agriculture, and William L Yount, Plant Pathologist with the Bureau of Plant Industry The men were inspecting the new variety for growth habits, disease resistance and keeping quality at a meeting of celery growers Monday in the vegetable preparation room on Funk's farm. Funk will produce the foundation seed and certified seed for commercial growers —L F Photo

Celery Growers Develop New Houser Type Strain

The long search to find a replacement for the Houser line of celery has come to a successful conclusion

Dr Roy Creech plant breeder from the Pennsylvania State University told 35 celery growers Monday afternoon, the years of crossbreeding and selection for a high quality variety has resulted in the release of the H-46 strain by the University

Seed of the new variety labeled Pen H-46 will be available to growers for the 1963 season

Release of the new variety is the culmination of a search which began shortly after World War II when growers realized the Houser strain had been lost

The loss came about when Japanese seed producers in the western seed growing areas were sent to relocation camps during the war Foundation stocks became lost and before growers realized that no more seed would be available, all stocks of commercial Houser seed were used

At the request of Lancaster County growers, Dr Bernard Pollock, then plant breeder at

Farmers Honor Smith For 25 Years Service

Lancaster County farmers and their wives turned out 350 strong Monday night to honor County Agent M. M Max Smith for 25 years of service in agriculture extension work.

Using the occasion of the annual banquet of the Lancaster County Agricultural and Home Economics Extension Association, the rural residents of the county paid tribute to Mr. and Mrs. Smith

Main speaker of the evening was Phillip Alampi, New Jersey secretary of agriculture, who called Smith, "a great agricultural agent"

Abe Bucher, a well known figure in Lancaster County agricultural circles showed a series of slides depicting Smith's life and career since coming to the county in 1937.

Others recalling incidents in Smith's career were Harold McCulloch, of the Pennsylvania State University Extension Service Staff, Harry S Sloat, the former associate county agent, and Levi Brubaker, a farmer from Rohrerstown. Brubaker presented Smith a

Maternity Stalls Unclean Dr. Guss Tells Dairymen

Maternity stalls for dairy cows are usually not fit for a cow to calve in, Dairymen were told Thursday night

Dr. Samuel Guss, extension veternarian of the Pennsylvania State University, speaking at the Lancaster District meeting of the Southeastern Pennsylvania Artificial Breeders Cooperative, said, unless the walls of the box stalls are clean enough that you could scrape peanut butter off them for your sandwich they are not clean enough for a maternity stall

Dr Gus recommended having the cow calve in her own stall. He suggested putting a bale of straw behind the cow to keep the calf out of the gutter, but he said this practice is much better sanitation-wise than holding the cow in a box stall

Dr Gass speaking on the subject, "Raising Healthy Heifers", said, "A calf is born with little protection except the skin she is born in' She must get the gamma globulin into her blood from the colostrum, or first milk, during the first few hours of her life After the first day of life, th calf has lost most of her ability to absorb the substance from milk By six weeks of age, he said, the calf must make her own antibodies to fight infection in her body

Guss also recommended that dairymen send for plans for individual calf pens available from the University He said one important feature

(Continued on Page 9)

TWO SECTIONS

Because Lancaster Farming is in two sections this week, the women's features will be found on pages 14 and 15 of the second section.

Young Farmers Hold Regional Meet At Solanco

YFA members will discuss "The Purposes of Our Young Farmers Organization' at a meeting of Region II of the Pennsylvania Young Farmers Association on March 6

The meeting, scheduled to begin with a tour of the new Solanco High School on Route 222 south of Quarryville, will get under way at 10 30 a m

After a short business session the morning program will take up discussion of the problem of purposes of the or-

(Continued on Page 14)

Hog Show, Sale Are Scheduled

March 14 has been reserved by the Lancaster County Swine Producers Association as the date for their annual market hog show and sale

Hogs will again be judged according to the breed of the sire with prizes awarded to champions of each class

The sale will be a feature eagerly awaited by those who saw all the champions of the show last year go to one local butcher at all-time-high prices

The show committee of the Swine Producers includes James Z Martin, secretary Earl Fisher, show manager, and Warren Leininger, president of the Assn Conducting the sale at the Lancaster Union Stockyards for the Livestock Exchange will be Justin Plank, chairman, John Stoudt Norman Barley and Walter Dunlap, Jr.

The annual banquet of the Association will be held March 22 in the Blue Ball fire hall.

Extension Assn. Elects Directors

Four directors were returned to office and one new one elected to a one-year term Monday night by the Lancaster County Agricultural and Home Economics Extension Association

Farmers voting at the annual meeting and banquet of the county extension association returned the following district directors to office: Northwest, J. Clayton Sangrey, Northeast, Willis Z Eshenshade; Southeast Mrs J Robert Hess, and Southern, Richard P Maule

Elected to the board from the Southwest district was Mrs Kenneth Musser, Columbia R2

Robert Groff, president of the association, conducted the election.

Lancaster County Soils Day To Feature Local Experts

Local farmers will team up with University experts to present a program of interest at the annual Lancaster County Soils Day next Thursday according to M M Smith, County Agent

The Soils Day is sponsored by the Lancaster County Extension Service and is open to all farmers and land owners in the area

A panel on "Improved corn production will be moderated by James H Eakin of the agronomy extension staff at the Pennsylvania State University and will feature the 1961 Corn Contest winners as panel members Names of the panel members will be announced on the day of the meeting

There will be on hand a very worthwhile group of exhibits and displays presented by local lime, fertilizer and seed dealers Smith said.

For the second consecutive year, the Soils Day will be held in the Pennsylvania Guernsey Association's sales pavilion located about six miles east of Lancaster on Route 30

The schedule of events for the day is as follows

10 00 a m — "Recommended Weed Control Practices George Berggren, Agronomy Extension Pennsyl-

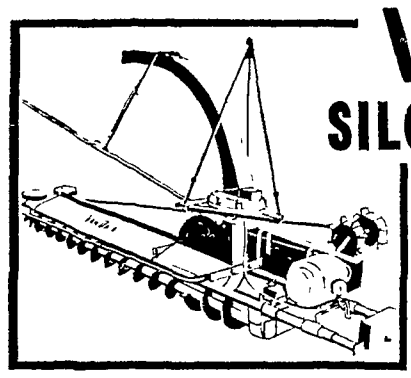
Complete automatic feeding for DAIRY COWS and CATTLE!

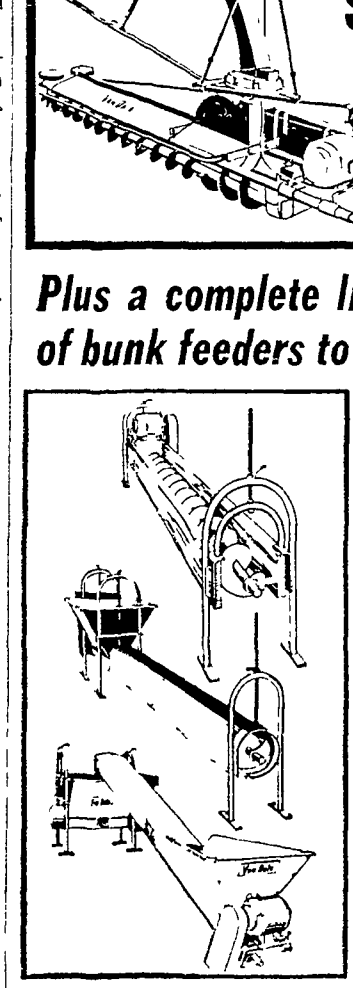
VanDale SILO UNLOADERS



Double augers deliver more silage per minute even when silage is deeply frozen . . and at a lower operating cost Patented V paddle impellers *throw* not blow . . silage down chute Adjustable drive hubs give positive traction in all types of silage

Three-point suspension keeps unloader level at all times.

Plus a complete line of bunk feeders to meet your exact needs



Straight-out Auger Feeder

With VanDale units you can custom build the bunk feeding set up to fit your needs Drive section includes hopper, drive assembly and 10, high capacity 9 auger Additional auger sections are in 10 units and are easily coupled

Feed-R-Flo Bunk Feeder

The new, all-metal complete feeder High capacity 9 auger rotates within tube Gives all-weather protection, even feed distribution, and lower operating cost.

Conveyor Trough

An important link in automatic feeding Positioned below silo chute, the VanDale conveyor trough carries the silage to the bunk feeder Primary section includes hopper, drive assembly, and 10, 9" auger. Additional 10 auger sections may be added.

See us for modern automatic feeding equipment

All

RED ROSE

dairy feeds now contain added vitamin A

There is convincing evidence among dairymen today that cows need vitamin A — to promote general over-all better health. Cows fed rations fortified with a higher concentration of vitamin A stay at peak production longer . . . are in better condition for calving . . . haircoats are glossier . . and young stock grow faster and take their place in the milking line earlier.

For better dairying — feed Red Rose Dairy Feeds with added vitamin A. We carry the complete line.

Moyer, Jr.), 6200 WV, 9-0 Starr Poultry, 19.1; 15 M&B, (Same), 6200 WV, 9-0, Island Poultry, 18.8; 16 Wm Flinchbaugh, 500 HF, NO Sale, 19.8, Bid

Fluid Milk

Volume Increase Loses Speed

Production of fluid milk increased in all areas, but the increase was at a reduced rate. Supplies were burdensome and diversions to manufacturing plants increased

Demand was somewhat lighter as schools closed for the holiday Manufacturing plants were operating at capacity and difficulty in placing surpluses were encountered

Delmarva - Georgia

Prices Advance About One Cent

Live prices advanced sharply to approximately one cent higher with a good demand for the moderate offering

Delmarva reported live broiler prices of 17 7 to 19 5 for 838 000 head at farms during the 24 hour period ending 10 30 Friday morning

Ready to cook poultry demand was good with irregular interest developing Estimated slaughter by eastern shore processors for the week end was 797,000 head compared with 876,000 head last week end

The Delmarva broiler-feed ratio for the week ending February 16 was down two points from the previous week reflecting the .64 drop in broiler prices

The ratio was 3.7 when broilers averaged 17 32 and mash cost the growers 93 68 per ton

For the comparable week a year earlier, the ratio stood at 4 2 when broilers averaged 19 37 and mash cost the grower $91 97 per ton

Wholesale selling prices at New York ranged $5.00 to $5 13 per 40 quart unit. Most of the sales were at $5 05 to $5 08 with the $5 00 price representing distressed sales

From Where We Stand . . .
A Tribute To 25 Years Of Service

Lancaster County farmers are justifiably proud of the reputation the county has gained as the Garden Spot of the world

Whether the excellent farming conditions in the county attracts excellent county agents, or whether excellent county agents produce excellent farming conditions might be argued

But be that as it may, the two appear to go hand in hand

Lancaster County has been fortunate enough to have had Floyd (Dutch) Bucher and Harry S Sloat in the County Agent's Office for many years Both are now retired

Still very much on the job after 25 years of service to the farmers of the county is the present County Agent, M M (Max) Smith

Max, who has been the farm agent in the county since 1949, has had no small part in helping the farmers of the county to perpetuate their reputation for agricultural excellence.

He has been ever ready to cooperate in bringing the latest in methods and materials to the attention of the rural residents of the county, and his many awards attest to the fact that his work has not gone unnoticed outside the county.

His selection as one of the recipients of the Distinguished Service Awards given by the National Association of Agricultural Agents in 1961 places him among the "Best of the Best" in America

Max could have moved on many times to high posts and executive positions in industry and government, but he chose to remain in Extension Service work

After 25 years, the farmers of Lancaster County are mighty thankful he chose to stay, and they hope this 25th year celebration will be just a milestone along a long, pleasant road yet to be traveled together

At least that's how it looks from where we stand

★ ★ ★ ★

The Search Ends

And while we are in the business of handing out bouquets, we think a spray, possibly including some celery for greens, should go to the vegetable breeders and commercial vegetable growers who helped produce a strain of celery to replace Houser.

For our money, these men deserve more than a bouquet We believe there is celery — and celery

If you have ever eaten a stalk of the "shipped in" kind and then pulled strings out of your teeth for the rest of the day, you know what we mean.

Lancaster County celery can not compete with celery anywhere except right here in Lancaster County It can not compete, we say, because it is so tender, tasty and succulent that it will not take the rough treatment of shipping This is precisely the reason for the strings in the "shipped" varieties

But there are far too many eaters in this county who have never taken the opportunity to taste and compare the truly excellent-quality celery produced locally There are far too many county residents who do not yet know what it is to eat real high-quality celery because it takes time, patience and care to grow that kind of crop, and the big stores buy from sources where huge volume and immediate supply can be furnished, even if quality has to suffer

Perhaps you won't be able to tell the difference if you chop the celery up in chicken stuffing or cream of celery soup, but just you put a few stalks on the table raw, and if the eaters can't tell the difference, you just don't have celery eaters in your family

Again we say, a boquet is due the celery growers for their persistent search and eventual victory.

At least that's how it looks from where we stand.

Tobacco Quotas And Controls Rejected By 6 to 1 Margin

Lancaster County tobacco growers want no one else to run their hands and they proved it by a six to one margin Tuesday

The growers baled up the situation and wrapped it for market when they went to the polls in the eighth consecutive referendum on marketing quotas and acreage allotments for cigar filler tobacco

The largest turnout in the history of the referendum in the county was recorded by the County Agricultural Stabilization and Conservation Service A total of 3,906 or an estimated 8,000 eligible voters cast ballots

When the votes were in 561 were in favor of the government's proposed program of market quotas and acreage controls Voting against the proposal were 3,320 There were 24 challenged ballots and one void ballot

Though 14 per cent voted in favor of the proposal where normally considerably less than 10 percent have voted for controls this was still a far cry from the two thirds approval needed for passage The 86 per cent in opposition to acreage controls was the smallest in county history

Growers in 11 other Pennsylvania counties added 339 negative ballots and 28 affirmatives ones

There had been some speculation prior to the voting that reports of Kentucky and Tennessee farmers raising cigar filler tobacco (in addition to the burley under their quotas) might swing the traditional Lancaster Countians toward control programs Kentucky and Tennessee farmers were not eligible to vote in Tuesday's referendum

Heaviest voting in the county was in the New Holland area where growers rejected the program 751 to 29

In the Ephrata area 97 per cent of the votes cast were against controls Also included in this area which polled the highest percentage against the program were West Earl and Upper Leacock townships

The greatest percentage in favor at any polling place gave controls was 32 per cent in Penn Warwick and Elizabeth townships

Since controls were voted down there will not be another referendum called by the government for three years unless one fourth of the growers petition for one If the referendum had yielded a vote in favor of controls the crops in 1962 63 and 64 would have been under marketing quotas and acreage allotments

In the county returns township by township ballots showed the following (for - against - challenged - void)

Conoy West Donegal and and Mount Joy 29-124-3-0

East Donegal and West Hempfield 68-167-4-0

Rapho 19-160-1-0

Penn Warwick and Elizabeth 85-180-0-0

The Clean Life

Lesson for February 25, 1962

WHAT is the most valuable feature of American life? It is not the supermarkets, the big double-lane highways, it isn't the cars or even the schools Many, even Christians, would say it is not even the churches that are the best American possession What is it (the reader is invited to think) which could get along without the church, but without which the church would soon wither away?

Dr. Foreman

The answer, of course, is the Christian home Christian church and Christian home support each other, sometimes with an assist from the school, sometimes not But the home is more indispensable to the church than the church to the home

What then is the inner support and foundation of a Christian home? The obvious answer is, Christian marriage Failure of a marriage means failure of a home

Attack on home

Today the home is under attack Not directly, no one would get a moment's hearing if he advertised himself as opposed to good homes But indirectly, in countless ways, marriages can be, and often are, poisoned in advance It is well known that one marriage in four, the country over, ends in divorce, and that though divorced persons often re-marry (for the stark and simple reason that they already have cheated wife or husband) they are not likely to make much more of the second try than the first

One of the deadliest ways to poison a marriage beforehand is to come to it no longer a virgin, and this holds true for man and woman alike From the very beginning, the Christian church and the Jewish synagogue have held up one standard for marriage Continence before, and chastity (faithfulness each to each) during marriage Whatever breaks down that standard does something to break down marriage itself. A home" where husband and wife are both survivors of many affairs with other people a marriage that knows nothing of faithfulness, a marriage ready to break in two the minute a homesomer man or a more alluring woman comes on the scene,—such a "home" is likely to have little or no regard for any children and may even resent them

Mind and body

The laws of any place fall behind the best ideals of the best people Any good lawyer will admit as much. But even the law, clumsy and "external" as it must be knows that adultery is wrong. But by the time adultery gets into the courts, or becomes a tragic basis for divorce, it has been going on for a long time. Jesus put it quite bluntly Any man who looks on a woman with lust in his heart, has already committed adultery with her There are only three requirements for any act, good or bad desire, capacity, opportunity And an act of adultery exists for a longer or shorter time in a mind first A clean life is not one that lacks legally punishable acts A clean life is one in which the law is not needed, it is a life that supplies its own discipline

Our special problems

In America at this time and for a generation or more before now, the Christian ideal of continence before marriage, chastity during it, itself has been eroded by constant attack Consider the books and magazines for sale at your nearby drugstores, consider the themes of popular moving pictures and novels, consider the moral standards of Hollywood and of their influence on our national life Consider the way women and girls dress To maintain a clean life in the midst of surrounding such as are common in America is extremely difficult, more so than for most previous centuries.

Yet there is one thing it will help us to keep in mind That is, that at the time the Christian church began, standards of relations between men and women, in the Roman Empire, where the infant church was born, were just as low as they are in America today, if not lower Yet the ideals of Christ outlived the empire The future of America is not with those large areas of corruption; it is with the small groups that intend to remain clean

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U S A Released by Community Press Service)

Now Is The Time . . .

BY MAX SMITH

To Topdress Winter Wheat

The yield of many fields of wheat will be increased by topdressing with 25 to 40 pounds of actual nitrogen per acre early in March On sand gravel or shale-type soils this practice will give real good yield increases on heavier more fertile soils it is not recommended because of the increased danger of lodging On some soils the nitrogen will leach out quicker and needs replaced for good yield On seeding made very late last fall or wheat stands that look pale-green early in March, the topdressing is recommended If the wheat is seeded down to clover or alfalfa, the rate should be only 25 to 30 pounds of actual nitrogen per acre on non-seeded stands the application may be 30 to 40 pounds per acre

To Be Careful With Home-Grown Seeds

Homegrown red clover seed is widely used throughout the county and the state, the variety Pennscott ranks high in this area and will give outstanding yields of quality forage However local growers are urged to be careful when buying local seed in that it does not contain weed seeds all homegrown seeds should be cleaned and germination tested before using this must be done at the State Department of Agriculture at Harrisburg is the seed to be offered for sale

To Plan For Early Spring Oats Seeding

Growers planning to make a spring oats seeding should make every effort to get it into the ground the last 10 days of March or the first 10 days of April these early spring seedings will out-yield the late April or May seedings Clint and Garry of Clinton 59 are recommended varieties

To Use Own Poultry Crates

(Continued on page 5)

● Now Is The Time

(Continued from Page 4)

Many poultrymen have found it helpful in preventing poultry infections and disease to take only their own crates into the poultry house, if the owner's crates are used to carry the birds out of the house, then transfer the poultry into the buyer's crates outside of the house, the chance of spreading diseases is reduced All flock owners, especially with laying flocks, should accept all possible disease prevention practices

● Tobacco

Malaria today kills an estimated 3,500 000 persons each year

Auctioneer License Deadline March 1

Pennsylvania auctioneers have until March 1 to apply for a state license

According to information from the state license bureau only about 200 of the 1,500 applications have been returned thus far to the Secretary of the Commonwealth, but a check with county auctioneers reveals that many of the local men have not received application forms

Elmer Murry president of the Lancaster County Auctioneers' Association said this week, If the forms don't come through in a few days I will just go over to Harrisburg and pick up a supply

Murry said his organization is in favor of the legislation passed by the last general assembly requiring all auctioneers to be licensed

Fees are $25 per year for experienced auctioneers and $10 for apprentices

Many of our neighboring states have fees of up to $100 Murry said

Simazine Approved For Orchard Use

Apple producers now have a new ally for control of weeds in established orchards New label acceptance has been announced for Simazine 80W herbicide Previously cleared for use on non-bearing fruit trees, it may now be used to control weeds in bearing orchards

Orchard weed control has been one of the time-consuming and more expensive operations in apple production Chemical weed control eliminates the costly cultivations formerly necessary to insure that all plant nutrients and moisture are available to growing and producing trees Chemical weed control with Simazine also will be of substantial aid in eliminating hiding places for mice which normally cause extensive losses in orchards during the winter

Simazine is applied as a spray in early spring prior to weed emergence in those orchards where trees have been established one year or more

The herbicide was first recognized for its efficiency in controlling weeds in corn Subsequent investigations have proved its safety for use in vineyards, cranberry bogs, orange groves, and nurseries producing ornamentals

Jersey Cows Make Records

Several registered Jerseys cows owned by Edison W Osborne, Peach Bottom have recently completed official production records giving them cow power index ratings This rating indicates how many times their body weight in milk they have produced during their recent lactation

The cows and their production are as follows Cornwall Design Echoe - 10 592 lbs milk 652 lbs fat 096 Index rating Cornwall Challenge Boss - 9 813 lbs milk 567 lbs fat 095 Index rating Cornwall Dukes Pride - 11,-948 lbs milk 630 lbs fat 118 Index rating Cornwall Gimbosc Cheryl - 11 593 lbs milk 607 lbs fat 138 Index rating Cornwall Welcome Windfall - 11,440 lbs milk, 601 lbs fat, 128 Index rating Cornwall Welcome Wilma - 10 163 lbs milk, 554 lbs fat, 107 Index rating, Cornwall Jolly D Challen - 10,978 lbs milk 606 lbs fat 107 Index rating

All records were made in 305 days lactation

These records are further proof that a dairy cow does not have to be big to be most efficient and profitable Osborne says

Realizing that we must obtain all the efficiency possible under todays dairying conditions Cattle Club launched their cow power program as another service to owners of registered Jerseys

Osbornes herd average last year on 116 Jerseys was 495 pounds of butterfat and 9 175 pound of milk

---

The first test of federal power the Whiskey Rebellion, came while Washington was president In 1794 Washington sent troops to crush the uprising by Pennsylvania farmers who refused to pay a federal tax on whiskey

● Celery Growers

(Continued from Page 1)

the Pennsylvania State University begun a search for strains of celery with the high quality flavor and keeping ability of Houser

When Dr Pollock moved to Cornell University Dr Creech took up the work and with the assistance of county growers continued selection from several strains of the H-46 celery

Since there are only about 200 acres of the local type of celery grown in the state, Dr Creech said, no commercial seed house is interested in producing seed

Amos Funk Millersville R1 one of the prime movers in the search for the new strain has agreed to produce and perpetuate the line until a seedsman can be interested in production

The breeding program at the University has been officially terminated, Dr Creech said, because no funds are available for continuing the program, but the college personnel will assist in the selection of seed stalks in the foundation plots at the Funk farm Each year selection will be made out of the trench, in order to select for keeping quality as well as other production characteristics

Seed of the Pen H-46 has not yet been cleared for certification by the state department of agriculture, but according to Cy F Campbell, In Charge of Seed Certification Service of the Pennsylvania Bureau of Plant Industry only final details need to be completed

Certification of Pen H-46 has not had final passage, but it looks like it will go through Campbell said

James Dutt extension vegetable specialist from the University told growers to continue soil tests in order to avoid throwing their soils out of balance nutritionally

He said celery is one of the heaviest potash feeders among all vegetable crops A good crop of celery will remove about 235 pounds of potash per acre from the soil This potash must be replaced, Dutt said, but if the potassium content gets too high, the plants will starve for magnesium and calcium

Dutt said only about 50 per cent of the available Potash can be picked up by the crop Therefore, the rate of application must be twice as high as the amount needed by the crop

In the case of Phosphorus, Dutt said, only about 25 per cent can be recovered by the crop under ideal conditions When conditions are not ideal the recovery may go down to as low as 12 per cent, and phosphorus deficiencies in the crop may show up when there is plenty of phosphorus in the soil.

But he reminded the farmers, when you can see the deficiency symptoms the damage has already been done Don't wait until you can see the damage before trying to correct the deficiencies, he warned

The same goes for irrigation "Don't hold off the water until you can see the damage" he said because it may then be too late to save the crop

It is sometimes treacherous to try to grow celery without irrigation he said but told the growers, "High organic matter content in the soil will act as a buffer against dry weather

He came back to soil tests to say "A soil test is not the complete answer but it will at least tell you where to start"

The significance of fever as a sign of illness was known to Hippocrates more than 2000 years ago

Farm Women 13 To Host No. 8

Members of the Society of Farm Women number eight will be guests of society 13 on Saturday, March 10 at 1 30 p m in the Farm Bureau Building, Dillerville Road

At the recent meeting of society eight in the home of Mrs Herbert Sarver, Walnut Tree Farm, Mount Joy R D, a representative of the Lancaster County unit of the American Cancer Society was guest speaker Albert C Pierson gave an illustrated talk on the work being done by the society and what individuals can do.

Two students from Donegal High School, David Greer and Patricia Nornhold spoke on "What a good diet means to me"

Roll call was answered by members mentioning officers serving in the Civil War

The group voted a donation to the Lancaster Heart Haven

Co-hostesses for the meeting were Mrs Norman Garber, Mrs Curvin Martin and Mrs William Long

4-H Camera Club Has Competition

An eleven-year-old girl who had never taken a picture before she enrolled in the Lancaster County 4-H Camera Club took first prize Wednesday night in the first club round-up and photo competition

LINDA OVERGAARD

Linda Overgaard, daughter of Mr and Mrs Walter Overgaard, Lancaster R4, snapped the shutter as her sister read a bedtime story to a younger brother and the result caught the judge's eye

THIS IS ONE OF MY BEST pictures, is the way Linda Overgaard describes the above picture In Linda's words, 'It shows my sister Ellen reading a story to my little brother. He seems to be wondering what will happen next His interest is shown by the expression on his face ' The picture was the winning entry in the 4-H Camera club competition Wednesday night

Linda went on to capture the prize for total project score as well scoring a total of 95 5 of a possible 100 points

Second in the total scores was Esther Overgaard sister of Linda, with 95 points Esther tied for second place in the exhibit phase of the contest with her twin sister Ellen who scored 94 in total points

Third place in exhibits went to David Denlinger Horse Shoe Road Lancaster He placed fifth in total score

Elsie Ann Hess 1719 Old Philadelphia Pike Lancaster placed fourth in total scores and fifth in exhibit

Linda a sixth grade student at Witmer Heights School received a gift certificate from a local camera shop

Douglas Smith, representing the Lancaster Camera Club, judged the competition

IFYE In Nepal

County Youth Sees Contrasts

Ed. Note: The following is a series of excerpts from the third special report from Glenn Porter in the country of Nepal. Glenn, whose home is at Washington Boro R1, is spending six months in the mountainous country of Nepal as a member of the International Farm Youth Exchange program of the national 4-H club program. Glenn's mother, Mrs. Edgar Porter, writes, "The second report never reached us."

A Contrast In Culture

Rapti Valley, situated in Central Nepal, has an area of six hundred square miles Four hundred square miles are dense jungle inhabited by rhinoceros, deer, tiger, and many other animals The foliage consists of dense forests and even denser elephant grass This grass grows to a height of twenty feet and is so thick that it hinders the elephant as he walks through it.

The jungle animals give the farmers a lot of trouble in some areas Rhinoceros and deer can raise havoc in a vegetable garden and rice field

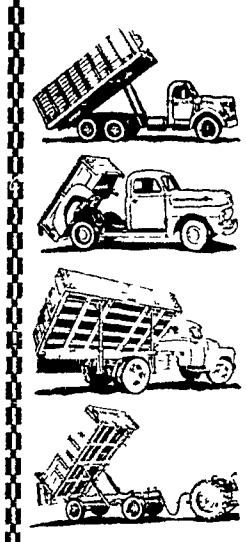
To protect their crops the natives dig trenches and build fences around the gardens Sometimes they rig noise-makers from tin cans and ropes to scare them away In some rice fields one will find a little straw hut built about six feet off the ground for a man to sleep in The presence of a man will frighten some animals away

The rhinoceros is under strict government protection because his numbers are dwindling Hunters kill them for their valuable nose horn. I cannot find out what the horn is used for, but men tell me that a good one is worth 5,000 Indian rupees in China. This is nearly a thousand dollars or nearly twenty times the yearly per capita income in Nepal The tiger makes his dinner on a cow, occasionally, or sometimes a man.

The Valley is showing signs of development with the help of U S aid There is a gravel road, in good condition, running most of the length of the valley This road gives access to India and Kathmandu. A large irrigation project is under construction When this is completed the agriculture

(Continued on Page 9)

HARSH HYDRAULIC HOISTS



The 32 available models come to you with a wide range of lifting capacities ranging from 3½ to 20 tons for your truck, pickup, or trailer The smooth, trouble free action of a HARSH HOIST has a fast lifting time of from 12 to 160 seconds, which allows more time for actual hauling

These hoists come to you at an average cost of only 16¢ a day as compared to the $10 $15 a day you now spend to manually unload your truck

To design and build a light-weight, low-costing truck hoist suitable for all types of farm use, priced within the average farmer's budget was the aim of "Bud" Harsh when HYDRAULICS UNLIMITED MFG. CO. began operations This hoist was built and is now in use throughout the nation.

The HARSH HYDRAULIC HOIST averages only $328 52 (including Federal excise tax) and maintains a low taxable weight which averages 273 lbs These economical hoists are built for either back or side dumping, depending upon your need

Save costly time and eliminate back-breaking labor by unloading with a HARSH HYDRAULIC HOIST engineered for economical, speedy, and durable farm use.

production will increase tremendously

There is a Rural Institute that, at present, is training Village Development Workers There are plans to enlarge it into an Agricultural College A large dormitory and class room building is under construction.

I live in the section inhabitated by the Tharus The Tharu tribe is native to the Valley Their culture is less sophisticated than any I have observed in Nepal They speak their own language so the little Nepali that I know was of little use

In this society women hold a higher status than men The

GLENN PORTER

women choose their husbands and can divorce them when they please If they remarry, the second husband must pay a penalty of sixty rupees to the first A woman can have one husband but a man many wives From this point things get complicated and the language barrier did not permit further understanding

For clothing the women wear a yard wide bikini around their waist The men wear a lot less I cannot think of a name for the contraption At night when it is cool, they wrap a shawl around themselves All of this is quite a contrast to the rest of Nepal, where the women rarely show more than an ankle and marriages are arranged by the parents

These people are very satisfied with life as it is When one man was asked about developing his area he replied 'Development will come when it comes but no one is in a hurry about it' The same attitude prevailed when Village Development tried to start a market where people could trade They have what they need and do not want any more On the other hand I found my host father ready to accept new things more readily

More from Nepal next week

Man breathes 1500 quarts of air per day or about 36 pounds while he eats about one pound of food and drinks two pounds of water, although air as associated with public health does not get the attention accorded to food and water

Hearings Are Set On River Bridge

HARISBURG — Secretary of Highways Park H Martin said today that a public hearing, may be held, if requested, to determine the economic effect of the proposed construction of the Susquehanna River Bridge in the Holtwood area connecting Lancaster and York Counties.

Interested citizens may request a public hearing by submitting a written request to J. C. Whalen, district engineer, 21st and Herr Streets, Harrisburg, on or before March 8 If a hearing is to be held, the time and place will be announced later

Meanwhile, Secretary Martin said, plans for the proposed bridge will be on display in the Eastern High School, main entrance hall, Wrightsville, on February 26, 27 and 28 between 3 30 and 9 p m Highway engineers will be present to answer questions concerning the proposed project Plans also are available for inspection at the office of the district engineer at 21st and Herr Streets

Secretary Martin said the bridge project will begin in York County at the intersection of Traffic Route 74 and Township Road 616, about 1 mile southeast of Sunnyburn It will proceed in a northeasterly direction, following closely Township Roads 615 and 793, crossing the Susquehanna River near the southern tip of Piney Island It will end on Traffic Route 372 near Bethesda, Lancaster County.

Have Tax Information

A depreciation schedule is worth money to the farmer when he makes out his income tax return, reminds Frederick Hughes, Penn State extesion farm management specialist.

● Young Farmers

ganization

On a panel moderated by James Bristline, state YFA president, will be Forney Longenecker of the Manheim Young Farmers, Boyd Gartley, teacher of vocational agriculture at the Octoraia High School, Gene R Daugherty, teacher of vocational agriculture in Eastern Lancaster School district, and Clyde Jackson, Chester-Delaware Area Supervisor of vocational agriculture

Dr Gene Love, professor of agriculture education at the Pennsylvania State University, will show colored slides of the activities Young Farmers in Pennsylvania Dr Love was formerly teacher of vocational agriculture at Maytown High School

Also on the afternoon program will be a talk, "The Need For Organization in Agriculture" by Jack Owen, Editor of Lancaster Farming and former teacher of vocational agriculture

George Derr, State Advisor of YFA will have remarks

The program will be conducted by Alfred R Overly Quarryville R1, Regional vice president of the state YFA

Local Resident Given Position By Oil Firm

Thomas T McCaskey a resident of Lancaster Pennsylvania has been appointed 'B station agent for American Oil Company's operation in Lancaster County Pennsylvania

He will operate the company's bulk plant which is located at 669 East Ross Street from which he will sell and deliver a complete line of the company's petroleum products

Prior to assuming his duties with his present employer McCaskey was employed in consumer sales work and was associated for many years with a local feed manufacturer

McCaskey is a native of Lancaster attended the local trade and high schools and graduated from Franklin & Marshall Academy He served four and one-half years in the United States Army in the south Pacific Theatre and received his honorable discharge with the rank of 1st Lieutenant

He and his wife, the former Betty Smith and their two sons Philip and Kevin, reside at 232 Lancaster Avenue, Lancaster, Pennsylvania.

CONGRATULATIONS ON 25 YEARS in the Lancaster County extension office are tendered to M M (Max) Smith by Mrs Daniel Trimble Quarryville R1 Mrs Trimble was among the 350 county rural residents who turned out Monday night to honor Mr and Mrs Smith L F Photo

● Farmers Honor

(Continued from Page 1)

purse made up by farmers of the county

Alampi considered an authority on agricultural marketing said there is a tendency on the part of farmers to hesitate to make adjustments to meet changing situations

This applies to production, but especially to marketing" he said He said farmers have a tendency to put all their energy into production and leave the marketing to someone else As long as this tendancy exists, you can see why farm marketing has been in trouble, he said

We have left the days of the five "P's of plow plant, pick, peddle and pray, he said and are now operating under the program of plan produce, prepare prepackage, and promote

Alampi complimented Dr William L Henning, Pennsylvania State Secretary of Agriculture for what he termed the "tremendous strides in marketing" in Pennsylvania in the past few years He said Pennsylvania is fortunate to have a man who knows marketing as swell as John Rainey does He said Rainey was an excellent choice to head the bureau of markets

But Alampi went on to say we are expecting too much when we expect a busy county agent to instantly become an expert in marketing problems He suggested that changes be made in college courses of marketing and agriculture economics

As it is now Alampi said too often we have amateur sellers dealing with professional buyers of agricultural products

To avoid this unadvantageous position the farmer turns to cooperatives or other members of trade to do their marketing for them

Alampi suggested putting the information in the hands of the county agent so that he will be better able to advise farmers on marketing problems

He said in the past we have seen commercial concerns compete with the county agent in passing out production information to farmers and now the commercial firms are beginning to do much of the marketing for the farmer Alampi said information should be made available to the county agent which will put him in a better position to offer marketing advice

Only in this way can the farmer hope to stay in competition in the revolution which has taken place in the food industry in the past decade, he said

4-H Beef Club Awards Made

Awards for excellence in steer feeding drew its reward Thursday night at the annual roundup and banquet of the Red Rose Baby Beef and Lamb Club

Two brother-sister teams were among those carrying away trophies from the meeting at the Armstrong Cork Co Auditorium

Rose Marie Linton received a trophy for her top steer in county competition while her brother Fred, Jr., both of Quarryville R2, had high score in total project competition His project book scored 98 6 out of a possible 100 points

Rhoda Mast, Elverson R1, won the Southeast District 4-H Reserve championship. Her brother Wesley had the grand champion steer in the Eastern National Livestock show at Timonium Md

Richard Toews; Lancaster R2 had the reserve county champion pen of wethers and the champion wether in the open class at the Pennsylvania Farm Show Kenneth Hess Strasburg had high project score of 91 5 out of a possible 100 He also had champion county pen and the reserve farm show champion

Wilbur Hosler, president of the club, was master of ceremonies at the beef banquet originally scheduled for February 9 and postponed because of bad weather M M Smith County Agent, presented the awards

Stops Wool Blindness

When wool grows over the heads and faces of sheep, experienced shepherds know this is an added problem Often the flock owner doesn't notice the condition until he sees sheep running into the side of the barn or bumping into other obstacles Frank Kreuzberger, Penn State extension livestock specialist suggests checking the flock and using a few deft strokes of the hand shears to quickly remedy the problem of "wool blindness"

Vincent Van Gogh was never examined by a neurologist or a leading psychiatrist but recent studies of the famous artist's life by psychiatrists indicate he was a manic depressive and that his brain was affected by absinthe to which he was an addict

Cull Potatoes For Livestock Feed Have Limits, Say Extension Men

With the price of potatoes at farms low and going lower, and with the national potato advisory committee recommending that only number one grade potatoes be put on the consumer market, the problem arises, What shall be done with the second and cull grades of potatoes?

Livestock extension specialists from the Pennsylvania State University have come up with some recommendations for using the cull potatoes as livestock feed There are some, precautions however, which should be considered fore any potatoes are fed to livestock

Cull potatoes are sometimes fed to livestock Their value varies with the way they are fed and to the class of livestock consuming the potatoes Potatoes are rather watery and, therefore, they are usually used in the areas of potato production since it does not pay to transport the water Badly sprouted potatoes should have the sprouts knocked off before feeding

Beef Cattle

Cull potatoes may be used in rations for steers or wintering brood cows They are worth about 80 per cent as much as corn silage in TDN but are deficient in Vitamins A and D and protein If fed to steers, the potatoes should be started at three pounds per head daily and increased until they are consuming not more than twenty pounds, extension livestock specialists say

A liberal supply of good hay should be fed with potatoes to make up for the deficiency of Vitamins A and D Since potatoes are low in protein, they should be supplemented with 1½ to 2½ pounds of protein supplement per day depending on the quality of hay fed and the size of the steers

A satisfactory silage can be made by adding 20 to 25 pounds of dry roughage such as hay or corn stover to each 100 pounds of potatoes This silage will be eaten readily by cattle or sheep

Some feeders prefer to chop or crush potatoes before feeding to cattle This prevents the possibility of choking

Swine

Experimental data shows that cooked potatoes should be fed to swine 420 pounds of cooked potatoes equal 100 pounds of shelled corn if properly balanced with other feeds Swine should not be fed more than four pounds of potatoes to each one pound of grain

Potatoes should be cooked until sott the surplus water being thrown away (it is bitter and unpalatable)

When feeding potatoes to swine, a good commercial hog supplement should be fed at the rate of one pound of supplement to each two and one-half pounds of shelled corn Not more than four pounds of potatoes should be fed to each one pound of corn

For Dairy Cattle

The total digestible nutrient (TND) content of potatoes is about equal to that of corn silage and approximately one-third that of good quality hay Potatoes are relatively low in dry matter, protein and vitamins A and D Some good quality legume hay or grass silage should be fed with them to help make up some of these deficiencies, says Richard Adams, extension dairy specialist

While some cows may eat 15-60 pounds of potatoes, it is recommended that dairy cows be limited to 15-25 pounds per head daily The grain mix used with potatoes should contain approximately the same level of protein as would be used with a similar amount of corn silage Potatoes should be considered as a pound for pound substitute for silage It takes 2½ and 3 pounds of potatoes to equal 1 pound of average and good hays respectively

Unripe decayed or frozen potatoes should not be fed as they contain a poisonous substance solanin For the same reason sprouted potatoes should not be used unless sprouts are removed

Gradually introduce potatoes into the ration to prevent digestive disturbances Potatoes should be sliced or chopped through an ensilage cutter before feeding to insure against choking of cattle and improve palatability Most diversion programs require that potatoes be chopped or sliced. Potatoes should be fed after milking and withheld for 4 hours prior to the next milking to avoid milk flavor problems

When feed supplies are inadequate, potatoes are worth a maximum of 20% of the value of the grain mix For example, potatoes may be economical at 60 cents or less per cwt with grain at $3 00 per cwt If higher in price, it would be more economical to feed grain at heavier rates, Adams said

---

Try to visualize what plants are going to look like when they grow up before you plant them, is the suggestion of A. O Rasmussen, extension ornamental horticulturist at Penn State It is easy to make the mistake of setting plants too close together, he says, not realizing how large they'll be when they mature

YOU'LL DO BETTER . . .

For the Farm Wife and Family

OATMEAL For Oomph!

By Mrs. Richard C. Spence

That box of oatmeal on your pantry shelf can be put to so many uses other than for a hearty dish of hot cereal that we would like to share some of them with you today

We all know that cereals are included in the basic food group so we should also know that combining them with other foods makes a doubly nutritious dish As in the case of rolled oats we can make breads pastry cookies desserts, as well as combining them with meats and other foods to make them delicious casseroles

Here we have two bread recipes — one uses yeast and one doesn't Take your choice'

OLD-FASHIONED OATMEAL BREAD

1 cake compressed or 1 package dry yeast
¼ cup lukewarm water
½ cup scalded milk
½ cup shortening
¼ cup sugar
1 teaspoon salt
2 eggs
3 to 3-½ cups sifted enriched flour
1 cup rolled oats quick or old-fashioned

Soften yeast in lukewarm water (Use warm water for dry yeast) Pour milk over shortening sugar and salt cool to lukewarm Beat in eggs softened yeast 2 cups flour and oats Stir in enough more flour to make a soft dough Turn out on lightly floured board or canvas knead until satiny about 10 minutes Round dough into ball place in greased bowl brush lightly with melted shortening Cover and let rise in warm place until double in size about 1 hour Punch dough down turn out on lightly floured board or canvas Cover and let rest 10 minutes Shape into bread rolls or coffee cake

Bread Divide dough in four parts Flatten one piece of dough into an oblong. Press out all the air with closed fists, working with the knuckles and back of the fingers Fold the dough in half lengthwise and flatten once again to press out all of the air. Lift dough at the ends and pull gently Slap the dough on canvas or board several times while pulling (Dough should be about 8 x 4 inches) Fold two ends of dough to the center and overlap them Seal by pressing with fingers Fold dough lengthwise again, folding only ⅓ of the way Roll dough back and forth and press ends to seal

Place in greased loaf pan (2-¼ x 4-½ x 2 inches) Repeat for other three parts of dough Let rise until bread is well rounded over top of pans about 45 minutes Bake in moderate oven (350 degrees) about 20 minutes. Makes 4 miniature loaves of bread.

Note Dough may also be shaped into one loaf and baked in a 1 pound loaf pan (8-½ x 4-½ x 2-½ inches) in moderate oven (375 degrees) about 45 minutes

Rolls Pull off small pieces of dough from large ball Roll into balls and flatten slightly Snip with scissors almost to center to form petals, place on greased cooky sheets Make an indentation in center of each with finger Cover and let rise until nearly doubled in size, about 45 minutes. (Remake indentation if necessary.) Fill center with strawberry preserves; brush with melted butter. Bake in hot oven (425 degrees) 8 to 10 minutes Makes 3-½ dozen rolls.

Coffee Cake. Divide dough in half Roll one piece to form a rectangle 10 x 14 inches. Brush with melted butter and spread with ½ cup canned prune filling Sprinkle with 1

Oatmeal

(From Page 14)

teaspoon cinnamon. Starting at outer long edges, cut dough into 1-inch strips cutting almost to center. Weave a strip from left side over one from right continuing until uncut portion is covered.

Repeat with other half of dough Place on greased cooky sheets; let rise in warm place until nearly double in size, about 45 minutes. Brush with melted butter Bake in moderate oven (375 degrees) about 20 minutes Cool; brush with confectioners' sugar frosting, sprinkle with chopped nutmeats. Makes 2 coffee cakes

OATMEAL BREAD

1-½ cups sifted enriched flour
1 teaspoon baking powder
½ teaspoon soda
½ teaspoon salt
1 teaspoon cinnamon
½ teaspoon nutmeg
¾ cup sugar
1-¼ cups rolled oats, quick or old-fashioned, uncooked
¼ cup melted shortening
2 eggs, beaten
¼ cup milk
1 cup mashed bananas
½ cup finely chopped nutmeats

Sift together dry ingredients, except oats. Add oats and remaining ingredients, stir until just blended. Bake in greased bread pan (1 pound size) in moderate oven (350 degrees) 1 hour Cool This bread is delicious spread with cream cheese

Rolled Oats make a delicious crunchy pie crust — as the following recipes will prove

PINEAPPLE CHIFFON PIE

Pie Crust:

1 cup sifted enriched flour
1 teaspoon salt
⅓ cup shortening
½ cup rolled oats, quick or old-fashioned, uncooked
3 to 4 tablespoons cold water

Filling

One 1 pound - 4-ounce can crushed pineapple
1 envelope unflavored gelatine
¼ cup pineapple juice
3 egg yolks
3 egg whites
½ cup whipping cream
¼ cup sugar

Heat oven to hot (425 degrees) For pie crust, sift together flour and salt Cut in shortening until mixture resembles coarse crumbs, add oats, mix lightly Add water a tablespoon at a time, stirring until pastry can be formed into ball. Turn out on lightly floured board or canvas Roll dough to form 12-inch circle, fit loosely into 9 inch pie plate Fold edge under flute Prick bottom and sides Bake in preheated oven (425 degrees) 12 to 15 minutes Cool

For filling drain pineapple reserve ¼ cup juice Soften gelatine in ¼ cup juice Mix together pineapple, softened gelatine and egg yolks in small saucepan Cook over low heat (may use double boiler) until gelatine is dissolved, stirring frequently. Cool until partially set Beat egg whites until stiff and glossy, fold into pineapple mixture Whip cream until frothy, gradually add sugar, whip until stiff Fold into pineapple mixture Pour into pie shell, chill until set Decorate with toasted coconut, pineapple wedges and maraschino cherries if desired

Here's another delicate filling for the above crust

HEAVENLY APRICOT PIE

2 cups chopped canned apricots
1 cup apricot juice
1 envelope unflavored gelatine
1 tablespoon lemon juice
½ cup whipping cream
¼ cup sugar

Drain apricots keep 1 cup juice Soften gelatine in ¼ cup apricot juice Place remaining juice apricots and lemon juice in saucepan Bring to boil remove from heat Add softened gelatine and stir until dissolved Cool until ge-

CRAN-MELLOW FLUFF PIE

Pie Shell:

1 cup quick or old-fashioned rolled oats uncooked
½ cup brown sugar
¼ cup melted butter
½ cup chopped nutmeats

Toast oats in shallow pan in moderate oven (350 degrees) 10 minutes Combine with sugar butter nutmeats Press onto bottom and sides of 9-inch pie plate Chill thoroughly Fill with Cran-Mellow Fluff

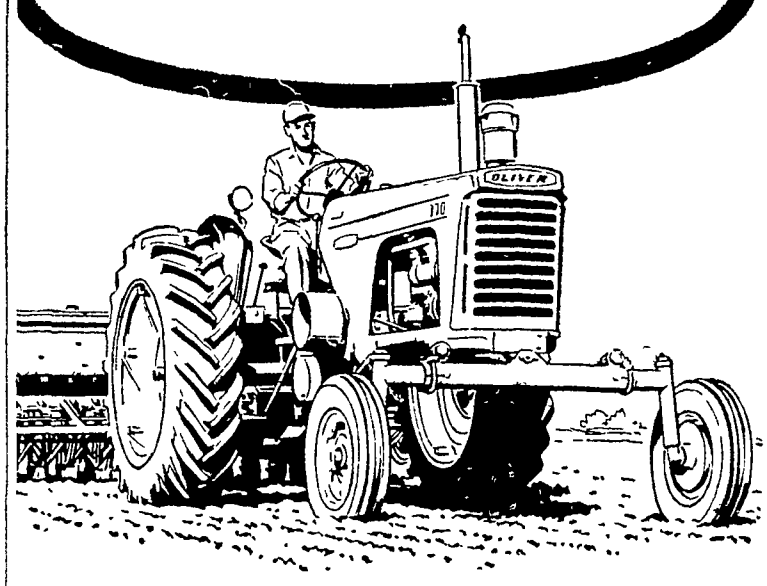
Ready to Go!

Peppy OLIVER 3-4 Plow 770



All new. and all set to go, ready to turn out more work in a day and to make it easier for you.

First of all, there's more horsepower in this new 770, coming from a deeper-breathing, higher-speed engine. Add the new Power-Booster Drive and you get 12 forward speeds, almost one-third more pull for heavy going at the touch of a lever—on the go.

Hook a new 4-bottom semi-mounted No. 5440 plow to Oliver's new Power-Traction Hitch and forget about the tough spots. Your 770 just bears down, steps right through at full speed. Put on Powerjuster wheels; let the engine change tread. And make driving a pleasure with power steering.

This is only the beginning. There's a lot more to see in the new 770. You'll want to feel this snappy power, too—in all the exciting new ways.

Fluff Filling

2 envelopes unflavored gelatine mixture is partially set Whip cream until frothy gradually add sugar whip until still Fold into apricot mixture Pour into pie shell refrigerate until set Decorate with pieces of apricot or whipped cream

* * *

tine
½ cup cold water
1 cup hot water
1 1-pound can (2 cups) whole cranberry sauce
½ cup sugar
2 tablespoon lemon juice
1 pint softened vanilla ice cream
Few drops red food coloring

Soften gelatine in cold water. Add hot water, stir until dissolved Combine cranberry sauce sugar and lemon juice in saucepan Heat to boiling remove from heat stir in gelatine Refrigerate until mixture mounds on spoon Stir in ice cream and food coloring Pour into chilled pie crust Refrigerate until set

* * *

The pinwheel biscuits topping this delicious casserole filling are made with rolled oats and are bursting with protein

WHEELIN' GOOD CASSEROLE

Base:

3 tablespoons butter or margarine
¼ cup flour
1 teaspoon salt
¼ teaspoon pepper
2 cups milk
1 tablespoon dry onion flakes
1 10-ounce package frozen succotash, cooked and drained.
2 7-ounce cans tuna, drained

Biscuits:

1-½ cups flour, sifted
3 teaspoons baking powder
1 teaspoon salt
½ cup rolled oats, quick or old-fashioned
⅓ cup shortening
½ cup milk
Melted butter or margarine
3 tablespoons chopped parsley
3 tablespoons chopped pimiento

Heat oven to very hot (450 degrees) For base, melt butter stir in flour, salt peper Gradually add milk, stirring constantly until mixture thickens Combine rest of ingredients with hot mixture Pour into 12 x 7-½ x 2-inch casserole

For biscuits, sift together flour baking powder and salt into bowl Stir in oats Cut in shortening until mixture resembles coarse crumbs Add milk mixing lightly only until mixture is dampened (Add a little more milk if necessary to make a soft dough)

Turn out on lightly floured board knead gently a few seconds Roll out to form 10 x 2-inch rectangle Brush with melted butter Sprinkle parsley and pimiento over dough Roll up as for jelly roll Cut in 1-inch slices Place in 3 rows over hot tuna mixture Bake in preheated oven (450 degrees) 15 to 20 minutes Makes 6 servings

Best Food Buys

Food Prices Are Not In Orbit.

While the thoughts of Americans may be orientated to soaring space capsules and astronauts this week, prices for many fresh produce items have settled back to earth The same improved weather conditions required for Americans space shot permitted harvesting operations and normal shipping schedules to be resumed, reports Tom Piper Penn State Extension Marketing Agent

Lettuce tomatoes and celery rate as better buys as shipments arrive in larger volume Green beans carrots cabbage and Brussel sprouts are reasonably priced and supplies are ample With an embargo on Cuban vegetables cucumbers and some peppers are being imported from the Bahamas and countries of Central America Added transportation charges promise to hold prices firm on these items

Potato storage holdings remain eleven percent above a year ago and this basic food item is rated an excellent buy

Sweet potato prices hold at unchanged levels Eggplant, endive and escarole plus cauliflower were higher price tags than usual for this season of the year Radishes are value priced, onion prices show

Best Food Buys

(Continued from Page 16)

signs of decline.

Apples remain in plentiful supply. Economy-minded shoppers would do well to place less emphasis on the color of apples, more on condition, if interested in quality. Grapefruit offers good value and lower orange prices are in prospect in the next few weeks. First-of-season Valencias, seedless and very juicy, are now appearing at local markets. Supplies of Temple and Murcott oranges are ample and a good choice for eating out-of-hand.

Banana prices remain steady as importers schedule shipments to satisfy consumer demand Somewhat lower prices are in prospect for pineapples as larger shipments arrive from Florida

Meat supplies remain ample and shoppers are reminded to check newspaper advertisements for featured items The low-price-season for pork cuts should continue until April and heavy supplies of beef cattle assure ample offerings of ground beef, steaks and chuck roasts

Frozen turkeys continue to be very plentiful and the best buy in poultry, although prices for frying chickens are gradually dropping. Eggs and all dairy products are economical choices for supplies of these items are abundant

Be Prepared

Best defense against a farm fire is a good fire extinguisher located in the right place Ralph Patterson, Penn State extension agricultural engineer, suggests every farm and home be equipped with suitable hand extinguishers that are properly maintained and easily reached if needed
